

## Evolve 2 range – Where is my dongle?

### Evolve2 65 + 75 – with and without stand.

For all of these models the dongle can be found within the protective soft pouch for the headset. Once you unzip the bag it should be right at the top.

### Evolve 2 85 – with and without stand.

Inside the case there is a tiny little pocket, when you first get it there is normally a little bit of material folded over it to hold the dongle in place. Just give this a pull and it should expose the dongle.
